Occupational Information

[Employment and Wages in North Carolina by Occupation](#)

The Occupational Employment and Wage Statistics (OES) program collects information on employment and wages by occupation through a semi-annual survey of North Carolina industries. The annually published data includes estimates of the number of workers and entry, average, and experienced wages by occupation for North Carolina, Statewide by Industry, the 14 Metropolitan Statistical Areas (MSAs), 24 Workforce Development Boards (WDBs), seven Economic Development Regions (EDRs), and counties. Confidentiality requirements must be met before data is published in the smaller geographical areas.

Wage Rates: [2001-2008](#)

Access Occupational Employment and Wages using the [Demand Driven Data Delivery System - D4](#)

North Carolina Occupational Projections 2006-2016

The Industry and Occupational Projections program is responsible for producing future estimates of employment Statewide and for the twenty-four defined Workforce Development Board Areas. All data used in the export base model are gathered from the Quarterly Census of Employment and Wages (QCEW), the Current Employment Statistics (CES) survey results, Census data, State Office of Budget and Management and the Occupational Employment Statistics (OES).

[Affirmative Action Packets](#)

EEO/Affirmative Action information based on Census 2000 for North Carolina and sub-state areas can be found at <http://www.census.gov/eeo2000/index.html>. This information has been gathered and prepared into convenient files (packets) for users to access online. A separate file containing the complete occupation titles along with its SOC code is also available.

(Note: The total unemployment rate, unemployment rate for males and unemployment rate for females were calculated using Census 2000 data and are not comparable to the unemployment rate calculated by the Local Area Unemployment Statistics unit.)

Information on developing or updating an affirmative action plan can be obtained by contacting the Raleigh local EEOC office.

Occupational Employment and Wages in North Carolina

Occupational wage data are presented in this report. Due to confidentiality and quality criteria, the Labor Market Information Division cannot produce estimates for every occupation in every geographic area.

Data for the surveys were collected on different occupational structures and therefore are not directly comparable.

OES Wage Releases

2001 2002 2003

January June January June January June 2007* 2008 2009
2004 2004 2005 2005 2006 2006

** "The Bureau of Labor Statistics is now reporting the Occupational Employment Survey estimates annually. Each annual estimate is based on the most recent two semi-annual surveys, and represents the most current data available. The next annual estimate will be published in late spring."*

** Indicates data items are either not available or not releasable.

1. Estimated Employment is the estimate of the total wage and salary employment in an occupation across the industries in which it was reported.
2. Response rate indicates the percentage of total schedules that were actually completed by the establishments.
3. The entry wage is the mean of the first third of the wage distribution.
4. The experienced wage is the mean of the upper two-thirds of the wage distribution.

- Annual wages are calculated by multiplying the estimated hourly wage by 2,080, except for those occupations for which a valid hourly wage cannot be calculated due to a non-standard work year. Annual wage for those occupations is calculated directly.
- These data represent wages across all industries. Wages within a given industry may vary.
- Data were prepared from the 2008 Occupational Employment Statistics combined wage file.

** Indicates data items are either not available or not releasable.

1. Estimated Employment is the estimate of the total wage and salary employment in an occupation across the industries in which it was reported.
2. Response rate indicates the percentage of total schedules that were actually completed by the establishments.
3. The entry wage is the mean of the first third of the wage distribution.
4. The experienced wage is the mean of the upper two-thirds of the wage distribution.

- Annual wages are calculated by multiplying the estimated hourly wage by 2,080, except for those occupations for which a valid hourly wage cannot be calculated due to a non-standard work year. Annual wage for those occupations is calculated directly.
- These data represent wages across all industries. Wages within a given industry may vary.
- Data were prepared from the 2008 Occupational Employment Statistics combined wage file.

** Indicates data items are either not available or not releasable.

1. Estimated Employment is the estimate of the total wage and salary employment in an occupation across the industries in which it was reported.
2. Response rate indicates the percentage of total schedules that were actually completed by the establishments.
3. The entry wage is the mean of the first third of the wage distribution.
4. The experienced wage is the mean of the upper two-thirds of the wage distribution.

- Annual wages are calculated by multiplying the estimated hourly wage by 2,080, except for those occupations for which a valid hourly wage cannot be calculated due to a non-standard work year. Annual wage for those occupations is calculated directly.
- These data represent wages across all industries. Wages within a given industry may vary.

- Data were prepared from the 2008 Occupational Employment Statistics combined wage file.
